

AI-DRIVEN

CYBER SECURITY

BUILDING ONE AI AGENT IS EASY. BUILDING A TEAM OF AI AGENTS THAT CAN SPECIALIZE, COLLABORATE, AND HANDLE REAL-WORLD SECURITY TASKS IS WHERE PRODUCTION AI ENGINEERING BEGINS.

WHAT ARE PRODUCTION AI AGENTS?

- BUILT FOR REAL-WORLD APPLICATIONS
- USE TOOLS, MEMORY, INSTRUCTIONS, AND GUARDRAILS
- HANDLE COMPLEX MULTI-STEP TASKS
- DESIGNED FOR RELIABILITY AND SCALABILITY
- CAN WORK AS A SINGLE AGENT OR A TEAM

AGENT SDKS

- MODERN AI PLATFORMS PROVIDE FRAMEWORKS FOR BUILDING PRODUCTION AGENTS.
- OPENAI AGENTS SDK
- GOOGLE ADK

MULTI-AGENT SYSTEMS

- EACH AGENT HAS A SPECIFIC RESPONSIBILITY
- AGENTS CAN USE DIFFERENT TOOLS
- SPECIALIZED AGENTS ARE EASIER TO CONTROL
- COMPLEX TASKS CAN BE DIVIDED BETWEEN AGENTS

SPECIALIZED SECURITY AGENTS

- **SOC AGENT**
- ANALYZES SECURITY ALERTS
- **THREAT INTELLIGENCE AGENT**
- INVESTIGATES IPS/DOMAINS
- **VULNERABILITY AGENT**
- ANALYZES CVES
- **INCIDENT RESPONSE AGENT**
- COORDINATES INVESTIGATION

AGENT HANDOFFS

- ONE AGENT CAN TRANSFER A TASK TO ANOTHER
SPECIALIZED AGENT
- THE RECEIVING AGENT CONTINUES THE TASK
- USEFUL WHEN A TASK CHANGES DOMAIN

MULTI-AGENT COORDINATION

- AGENTS COMMUNICATE THROUGH DEFINED WORKFLOWS
- EACH AGENT HAS A CLEAR ROLE
- ONE AGENT CAN DELEGATE WORK
- RESULTS CAN BE COMBINED
- COORDINATION REDUCES THE WORKLOAD OF INDIVIDUAL AGENTS

ORCHESTRATOR AGENT

- ACTS AS THE CENTRAL COORDINATOR
- UNDERSTANDS THE OVERALL TASK
- DECIDES WHICH AGENT SHOULD HANDLE EACH PART
- COMBINES RESULTS
- PRODUCES THE FINAL RESPONSE
